

The Dedication of DSS-12 to the Dr. Michael J. Klein Radio Observatory

Mike Klein's passionate dedication to students is one of the great legacies he left us. The dedication of the DSS-12 radio telescope as the Michael J. Klein Radio Observatory is a fitting tribute to a man known for his work with planetary studies and beyond. In addition to his extraordinary work with GAVRT, Dr. Klein served as the JPL Project Manager for the Search for Extraterrestrial Intelligence (S.E.T.I.) Project. As part of his work on this project, he coordinated a targeted search of objects as part of a sky survey conducted by JPL. In addition, Mike was renowned for his work on Jupiter Patrol studies, monitoring changes in the radio emission from the Jovian magnetosphere as well as early measurements of Uranus at radio wavelengths. Mike understood that making a life was about giving and he gave us all so much!

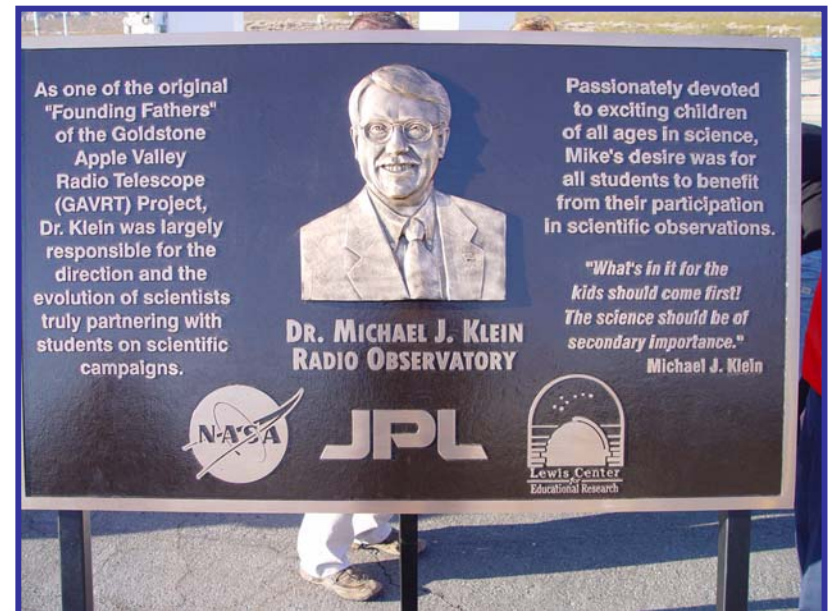

Mike Klein speaks to students at the Academy for Academic Excellence during one of his many visits to the Lewis Center.

"What's in it for the kids should come first! The science should be of secondary importance."

Michael J. Klein, PhD.

The Klein family gathers for the unveiling of the plaque that will be placed on the DSS-12 Radio Telescope.

This plaque will be placed at the base of the DSS-12 Radio Telescope which has been re-named the "Dr. Michael J. Klein Radio Observatory".
