

GAVRT Joins LCROSS at the Return to the Moon Family Night Event in San Jose, CA!

On September 6, GAVRT Operator Ken Judeh and IT Tech Hastin Zylstra traveled to NASA Ames Research Center in Moffett Field, CA along with LCER CEO Rick Piercy and Administrator Gordon Soholt to . The GAVRT staff set up a booth to allow both parents and students a try at running the 500 ton radio antenna that GAVRT students across the country and around the world will use to track LCROSS as it approaches the moon before impacting one of the moon's south pole craters.

Ken Judeh passes along information about the GAVRT Program to an interested parent and student.

Mission Control Operator Ken Judeh assists a young student in operating the DSS-12 radio telescope at the event in San Jose.
