AR 5141.27: STUDENTS MANAGEMENT OF LIFE THREATENING ALLERGIES AND DIETARY RELATED MEDICAL CONDITIONS

Adopted: September 11, 2023

Revised:

Definitions

Special dietary needs include food intolerances, allergies, and other medical needs that may require avoidance of specific foods.

Food allergies are abnormal responses of the body's immune system to certain foods or ingredients.

Anaphylaxis is a potentially life-threatening hypersensitivity to a substance and may be caused by a food allergy. Symptoms may include shortness of breath, wheezing, difficulty breathing, difficulty talking or swallowing, hives, itching, swelling, shock, or asthma. (Education Code 49414)

Epinephrine auto-injector is a disposable drug delivery system with a spring-activated concealed needle that is designed for emergency administration of epinephrine to persons suffering a potentially fatal reaction to anaphylaxis. (Education Code 49414)

Notification by Parent/Guardian

The parents/guardians of any student who has a known food allergy or other special dietary need shall notify the President/CEO or designee, in writing, and provide written medical documentation, signed by the student's health care provider, that describes the nature of the student's condition, instructions, and necessary medications. If the student's condition requires food substitutions or modifications in school meals, the written statement shall also describe the specific foods to be restricted and the foods that should be substituted.

Health Plan

Upon receiving notice of a student's food allergy or other special dietary need, the President/CEO or designee shall ensure that a written health plan is developed, in consultation with the student's parents/guardians and health provider, to manage the student's needs while at school or at a school-sponsored activity. The plan shall seek to minimize the student's risk of exposure to the allergen and address actions to be taken if exposure occurs.

As appropriate, the plan may include specific food prohibitions and substitutions, an identification of common school rooms where the student may be exposed, staff responsibilities, information and training to be provided to staff, accommodations and services to facilitate the student's participation in the educational program, and medical/emergency protocols.

When a student with a food allergy or other special dietary need has been identified as disabled pursuant to Section 504 of the Rehabilitation Act of 1973 or the Individuals with Disabilities Education Act, necessary accommodations and services shall be identified as part of the student's Section 504 services plan or individualized education program, as appropriate.

Prevention Strategies

To minimize students' exposure to foods to which they are allergic, the President/CEO or designee shall, at a minimum, implement the following preventive measures:

1. Notification to LCER Staff

When notified by the parent/guardian that a student has a food allergy, the President/CEO or designee shall inform the student's principal, teacher(s), school nurse, coach, and/or any other personnel responsible for supervising the student.

The principal or designee shall notify substitute staff of the identity of any students with known food allergies and the school's response plan.

2. Food Services

LCER's food services program shall make food substitutions in breakfasts, lunches, and after-school snacks when students are considered to have a disability under Section 504 that restricts their diet and when a health care provider has signed a statement of need that includes recommended alternate foods.

Substitutions may be made on a case-by-case basis for students who do not have a disability under Section 504 but who cannot consume the regular breakfast, lunch, or after-school snack because of medical or other special dietary needs, when supported by a statement of need signed by a health care provider.

LCER's food services staff shall check food labels or specifications to ensure that foods do not contain traces of substances to which the student is allergic.

Under no circumstances shall food services staff prescribe nutritional requirements or revise a diet order prescribed by a health care provider.

Food substitutions shall not result in any additional cost to the student.
